

Your Complete WiFi Surveys Solution

Optimize Wireless Coverage
With TailWind

**Poor placement and
interference slow you down.**

We optimize your network
for seamless connectivity.

**Dead zones and
weak signals?**

Our surveys pinpoint
issues to ensure full,
reliable coverage.

Designing or upgrading?

We build cost-effective,
high-performance wireless
networks.

The TailWind WiFi Survey Solution

Take Control of Your Wireless Network Performance

Precise Access Point Placement

We help you determine the ideal number and placement of **WiFi access points (APs)** to maximize coverage while minimizing hardware costs.

Interference & Coverage Analysis

Our surveys identify physical and radio frequency (RF) interferences that cause connectivity issues, ensuring **uninterrupted wireless performance**.

Passive & Predictive Site Surveys

Using **Ekahau AI Pro**, our certified engineers conduct both **passive and predictive WiFi surveys** tailored to your environment and operational needs.

Stakeholder Discovery & Planning

We **collaborate with your IT team** to review floor plans, validate maps, measure wall loss, assess device compatibility, and align with aesthetic requirements.

Scalable for Multi-Site Enterprises

From a single location to **nationwide multi-site deployments**, our team delivers **reliable WiFi surveys** customized to your business needs.

Why TailWind for WiFi Surveys?

With TailWind as your trusted WiFi Survey partner, you'll get precise, data-driven insights to enhance your wireless network's performance. Our Ekahau-certified engineers work directly with your IT team to ensure optimal design, minimal interference, and a network that meets your business requirements.
